Mathematics and Computers in Simulation 47 (1998) 601–603

MATHEMATICS AND COMPUTERS IN SIMULATION

Author index of volume 47 (1998)

(The issue number is given in front of the page number)

Abouchabaka, J., R. Aboulaich and **A. Souissi,** Numerical approach to a free boundary in the junction field effect transistor – MESFET (6) 531–539
Aboulaich, J., *see* **Abouchabaka, J.** (6) 531–539
Alexandrov, V.N., Efficient parallel Monte Carlo methods for matrix computations (2–5) 113–122
Arnold, M. and **K. Frischmuth,** Solving problems with unilateral constraints by DAE methods (1) 47–67
Beikert, G.J., Next event estimation of cell tallies (2–5) 123–132
Ben Nowman, K. and **G. Sorwar,** Computation of Japanese bonds and derivative securities (6) 583–588
Bideux, L., *see* **Robert, C.** (2–5) 419–427
Bidner, M.S., *see* **Savioli, G.B.** (1) 17–36
Blume, D., M. Lewerenz and **K.B. Whaley,** Excited states by quantum Monte Carlo method (2–5) 133–141
Bondot, P., *see* **Robert, C.** (2–5) 419–427
Cerf, N.J. and **S.E. Koonin,** Monte Carlo simulation of quantum computation (2–5) 143–152
Coulibaly, I. and **C. Lécot,** Simulation of diffusion using quasi-random walk methods (2–5) 153–163
Delgado, A., Phase portrait approximation using dynamic neural networks (1) 1–11
DeLuca, P.R., *see* **Tombuyses, B.** (2–5) 493–505
Devooght, J., *see* **Marseguerra, M.** (2–5) 371–382
Devooght, J., *see* **Smidts, O.F.** (2–5) 461–472
Dimov, I., *see* **Karaivanova, A.** (2–5) 201–213
Dimov, I., *see* **Nedjalkov, M.** (2–5) 383–390
Dimov, I., *see* **Nedjalkov, M.** (2–5) 391–402
Dimov, I.T. and **T.V. Gurov,** Estimates of the computational complexity of iterative Monte Carlo algorithm based on Green's function approach (2–5) 183–199
Dimov, I.T. and **V.N. Alexandrov,** A new highly convergent Monte Carlo method for matrix computations (2–5) 165–181
Doyle, J.P. and **H. Rief,** Photon transport in three-dimensional structures treated by random walk techniques: Monte Carlo banchmark of ocean colour simulations (2–5) 215–241
Dubi, A., Analytic approach & Monte Carlo methods for realistic systems analysis (2–5) 243–269
Dubus, A., *see* **Tombuyses, B.** (2–5) 483–491
Frischmuth, K., *see* **Arnold, M.** (1) 47–67
Gallmeier, F. and **W. Gaubatz,** Criticality calculations with MCNP4A using correlated sampling methods (2–5) 271–285
Gammal, A., Numerical integration of the interaction energy of two point charges (1) 13–16

Gaubatz, W., *see* **Gallmeier, F.** (2–5) 271–285
Genz, A., Stochastic methods for multiple integrals over unbounded regions (2–5) 287–298
Gruzza, B., *see* **Robert, C.** (2–5) 419–427
Gueorguiev, Y., K. Vutova and **G. Mladenov,** Numerical modelling of the processes of exposure and development in electron beam lithography on high temperature superconductor thin films (2–5) 299–307
Gurov, T., *see* **Nedjalkov, M.** (2–5) 391–402
Gurov, T.V., *see* **Dimov, I.T.** (2–5) 165–181
Gurov, T.V., *see* **Dimov, I.T.** (2–5) 183–199
Halton, J.H. and **P.K. Sarkar,** Increasing the efficiency of radiation shielding calculations by using antithetic variates (2–5) 309–318
Handscomb, D., Simulation of order transitions on a parallel computer (2–5) 319–327
Ibrahim, I.H., *see* **Ismail, G.A.F.** (6) 541–552
Ismail, G.A.F. and **I.H. Ibrahim,** A new higher order effective P–C methods for stiff systems (6) 541–552
Ismail, M.S. and **T.R. Taha,** A numerical study of compactons (6) 519–530
Jacovkis, P.M., *see* **Savioli, G.B.** (1) 17–36
Janke, W., Nonlocal Monte Carlo algorithms for statistical physics applications (2–5) 329–346
Karaivanova, A. and **I. Dimov,** Error analysis of an adaptive Monte Carlo method for numerical integration (2–5) 201–213
Koonin, S.E., *see* **Cerf, N.J.** (2-5) 143–152
Korn, G.A., Solving 5997 differential equations under Microsoft Windows 95 and NT (6) 571
Kurbanmuradov, O., *see* **Sabelfeld, K.K.** (2–5) 429–440
Labeau, P.E. and **E. Zio,** The cell-to-boundary method in the frame of memorization-based Monte Carlo algorithms. A new computational improvement in dynamic reliability (2–5) 347–360
Labeau, P.E., *see* **Marseguerra, M.** (2–5) 371–382
Lécot, C., *see* **Coulibaly, I.** (2–5) 153–163
Lewerenz, M., *see* **Blume, D.** (2–5) 133–141
Marseguerra, M., and **E. Zio,** Monte Carlo simulation of the effects of human intrusion on groundwater contaminant transport (2–5) 361–369
Marseguerra, M., E. Zio, J. Devooght and **P.E. Labeau,** A concept paper on dynamic reliability via Monte Carlo simulation (2–5) 371–382
Mladenov, G., *see* **Gueorguiev, Y.** (2–5) 299–307
Nedjalkov, M. and **I. Dimov,** Convergency of the Monte Carlo algorithms for linear transport modeling (2–5) 383–390
Nedjalkov, M., T. Gurov and **I. Dimov,** Statistical modeling of pulse excited electron quantum kinetics in a one-band semiconductor (2–5) 391–402
Ninomiya, S., Constructing a new class of low-discrepancy sequences by using the β-adic transformation (2–5) 403–418
Rief, H., *see* **Doyle, J.P.** (2–5) 215–241
Robert, C., B. Gruzza, L. Bideux and **P. Bondot,** A Monte Carlo study for electron elastic backscattering based on layered models for substrates (2–5) 419–427
Sabelfeld, K.K. and **O. Kurbanmuradov,** Two-particle stochastic Eulerian–Lagrangian models of turbulent dispersion (2–5) 429–440
Sabelfeld, K.K., Stochastic models for coagulation of aerosol particles in intermittent turbulent flows (2–5) 85–101

Sarkar, P.K., *see* **Halton, J.H.** (2–5) 309–318
Savioli, G.B., P.M. Jacovkis and **M.S. Bidner,** On some numerical methods for solving 2D radial flow towards on oil well (1) 17–36
Semerdjiev, Tz.A., V.P. Jilkov and **D.S. Angelova,** Target tracking using Monte Carlo simulation (2–5) 441
Shalimova, I.A., A Monte Carlo iterative procedure for solving the pseudo-vibration elastic equation (2–5) 449
Simonov, N.A., Monte Carlo solution to three-dimensional vorticity equation (2–5) 455–459
Smidts, C., *see* **Tombuyses, B.** (2–5) 493–505
Smidts, O.F. and **J. Devooght,** A non-analog Monte Carlo simulation of transport of radionuclides in a porous medium (2–5) 461–472
Sobol, I.M., On quasi-Monte Carlo integrations (2–5) 103–112
Souissi, A., *see* **Abouchabaka, J.** (6) 531–539
Stefan, H.G., *see* **Stefanovic, D.L.** (1) 37–46
Stefanovic, D.L. and **H.G. Stefan,** An accurate and efficient algorithm for numerical simulation of conduction-type problems (1) 37–46
Taha, T.R., *see* **Ismail, M.S.** (6) 519–530
Tichy, R.F., Numerical analysis of Jacobi series – A quasi-Monte-Carlo approach (2–5) 473–481
Tombuyses, B. and **A. Dubus,** Contribution to the study of elastic electron backscattering from polycrystalline metallic targets by Monte Carlo simulation (2–5) 483–491
Tombuyses, B., P.R. DeLuca and **C. Smidts,** Backward Monte Carlo for probabilistic dynamics (2–5) 493–505
Toumi, A., A well adapted approach to block-diagonalization of large scale systems (6) 553–570
Vutova, K., *see* **Gueorguiev, Y.** (2–5) 299–307
Whaley, K.B., *see* **Blume, D.** (2–5) 133–141
Zio, E., *see* **Labeau, P.E.** (2–5) 347–360
Zio, E., *see* **Marseguerra, M.** (2–5) 361–369
Zio, E., *see* **Marseguerra, M.** (2–5) 371–382
